Radiosurgery Treatment Planning

Brainlab Academy organizes courses for clinicians and medical physicists pursuing full proficiency with Brainlab radiosurgery treatment planning systems. Certified instructors facilitate hands-on practice sessions on dedicated workstations with typical clinical cases to discover the intricacies of the software and learn to generate expert radiosurgery treatment plans. Specialized experts and experienced clinicians provide insights into the underlying algorithms and share expertise related to machine commissioning, quality assurance, clinical prescriptions, patient positioning and treatment outcomes.

AUDIENCE

- › Medical physicists
- › Radiation oncologists
- › All other clinicians involved in stereotactic radiosurgery and stereotactic radiotherapy treatments

FORMAT

Three different training courses are proposed:

- › Hands-on classroom training with Brainlab radiosurgery treatment planning portfolio
- › Clinical training at a Brainlab reference site by clinicians on subjects like machine commissioning, quality assurance, clinical prescriptions, patient positioning, treatment outcomes
- › Remote online hands-on radiosurgery treatment planning practice training guided by certified instructors
